VARIETY of Interactive Tools available to help you visualize the perfect door for your home.

UNLIMITED Curb Appeal because beautiful homes deserve beautiful entryways.

You're in expert hands.

Choosing a Therma-Tru door means designing an inspired entrance with the confidence that it will perform for years to come.

Whether it's Classic or Contemporary – or somewhere in between – Therma-Tru offers a selection to complement the architecture of any home and a homeowner's sense of style.

With a complete door system engineered with craftsman precision and backed by more than 60 years of industry experience, you can be confident that it will perform as exceptionally as it looks.

That's where the beauty of choosing Therma-Tru begins.

A history of innovation.

It was a bold innovation for the home-building market when we introduced an entry door that looked as beautiful as wood and was more durable. At Therma-Tru, we have been revolutionizing the industry from the start – a spirit you can continue to expect from the leading entry door brand most preferred among trade professionals.*

Our roots in the door industry go back to 1962, when David Welles purchased a bankrupt building supply company in Toledo, Ohio. In 1983, we launched our Fiber-Classic® style, the first fiberglass door on the market, creating a product never seen before: An entry door that looked as beautiful as wood but with exceptional performance. Learn more about Therma-Tru at thermatru.com/history.

Building stronger partnerships and better entryways.

“Builders rely on us to provide products that will perform. The warranty gives us confidence to offer Therma-Tru doors to our customers. That, and we've never had any problems with Therma-Tru doors. The product quality is consistent.”

“Therma-Tru also offers one of the largest glass selections available in the industry and the most true-to-wood look on a fiberglass door.”

Kevin K., Overhead Inc. in Ohio
More than 25 years using Therma-Tru

THERMA-TRU
DOORS

Engineered to work together.

Therma-Tru specifies all of the components to work together at the most critical points where an ordinary door system's performance can fail, letting in air and moisture.

By forming a tight seal against drafts and leaks, these components can help protect the door system and home against costly damage and deterioration.

- 1 Sill
 - 2 Bottom Sweep
 - 3 Corner Seal Pads
 - 4 Hinges
 - 5 Weatherstrip
 - 6 Multi-Point Locking System
 - 7 Glass Options
 - 8 Composite Door Frame
 - 9 PrismaGuard® Finish – Paint or Stain
- See your Therma-Tru seller for details on product availability.

Learn more about our system components at: thermatru.com/components.

Backed by our lifetime limited warranty.

We can stand behind more parts and for longer than most other door companies because we make or specify everything that goes into our door systems. The homeowner has one source, Therma-Tru, to turn to if an issue arises with the door system.¹ Most other companies either don't warrant as many parts of the door system or warrant them for a shorter period of time. That could leave the homeowner without coverage and confused about who to turn to if issues arise.

¹Excluding improper assembly of components into a door system by the distributor, dealer, builder or remodeler, and the installation of the door system.
²Excluding installations within 5 miles of a body of salt water and the finish.
³Excluding normal wear and tear.
⁴See your Therma-Tru seller for details on product availability.
 **Based on version 6.0 ENERGY STAR product specification for windows, doors and skylights.
 Note: See your Therma-Tru seller or visit www.thermatru.com for details on limited warranties and exclusions, and ENERGY STAR qualified products.

Tested for endurance.

Go ahead and slam the door if you want. We did – over and over – to make sure our doors, glass and components live up to your toughest expectations. We expose them to extreme weather conditions. We roll heavy objects over our sills. We immerse parts with metal finishes in corrosive salt atmospheres. And we expose them to ultraviolet (UV) light to make sure our weathersealing parts and metal finishes can resist deteriorating and color fading in the sun. That's how we know that a Therma-Tru door is designed to stand up to almost anything life throws at it.

Choosing a durable door.

Kids, pets and neighbors come and go all day long. Which means that when it comes to choosing a new door, reliability and durability matter.

More than 80% of Therma-Tru door and glass options – thousands of choices – are ENERGY STAR® qualified.**

The fiberglass difference.

With very little maintenance, a fiberglass door can bring a home years of beauty, durability and energy efficiency. Therma-Tru fiberglass doors offer the authentic look of wood. But, unlike wood, fiberglass will not warp or rot. And, unlike steel, it will not dent or rust. Built with a polyurethane foam core, Therma-Tru fiberglass doors insulate against cold and heat for exceptional energy efficiency.

The look of real wood.

Realistic wood grains that are virtually indistinguishable from high-grade wood doors, thanks to Therma-Tru's AccuGrain technology.

The importance of curb appeal.

A stylish new front entryway can help convey your personal style and highlight your home's overall architectural style and curb appeal. For more information and inspiration visit thermatru.com/curbappeal.

Before

Fresh look. Increased value.

In a recent survey, real estate agents were shown images of various homes, including some that had been modified with a new Therma-Tru door, and asked to estimate the value of the home. While results varied, the survey suggests choosing a Therma-Tru door that complements the home's architecture could **add up to 7% to the perceived value** of a remodeled home.*

That's a potential increase of up to \$21,000 on a \$300,000 home for a project that can be done in a single day.

After

*Not a guarantee of investment returns, increase in value or selling price. See 2021 Therma-Tru National Home Valuation Study surveying real estate agents about perceived remodeled home value estimates based on exterior appearance. Not based on actual home sales data. Results may vary based on region, door style and home style. Study was commissioned by Therma-Tru and conducted by the Farnsworth Group, an independent research provider.

Virtual Experience

Discover the Therma-Tru difference online at the Therma-Tru Virtual Experience. Explore new products, home design trends, marketing tools, training and more in a fully immersive virtual environment that's available 24/7.
